Sustainable Design Practices

Berona Engineers; **LEED Accredited Professional** on staff that is able to work with clients to create sustainable and cost effective buildings. BEI is familiar with many sustainable design guidelines and programs. We understand that sustainable design requires cost effective, high performance systems tuned to work in harmony with the entire building, balancing occupant comfort with the natural environment.

Berona Engineers is also familiar with the Evergreen Sustainable Development Standard (ESDS) and Built Green.

Added Value

We understand current regulations affecting public and private facilities and new/upgrades/renovations:

- ❖ Diverse project type design experience
- ❖ Extreme weather design capabilities
- ❖ Indoor air quality (IAQ) design, especially in tobacco smoke environments
- ❖ Building Energy Modeling Services
- ❖ Revit/BIM Services

Additional LEED Projects: UW Transportation TI, Platinum CI; IMCO Office, Certified NFGC, Gold CI
